

PREPACKAGED
APPLICATIONS
FROM SYCLO MAKE
YOUR DATA MORE
VALUABLE

The SMART Mobile Suite of products combines the efficiency of wireless technology and the strength of back-office workflow and service management systems for unparalleled effectiveness. This family of products is prepackaged for affordable deployment in just weeks. And because SMART Mobile Suite is preintegrated with the leading work management applications, workers only need minimal training to immediately begin capturing and accessing information at the point of performance. Extending application data to remote workers on the plant floor or out in the field significantly increases productivity by 40 to 60 minutes per technician, per shift, allowing organizations to complete more planned work.

THE CORE BENEFITS OF SMART MOBILE SUITE INCLUDE:

Increased Productivity — Mobile technology eliminates paper work orders and redundant data entry, boosting productivity for technicians and administrative staff.

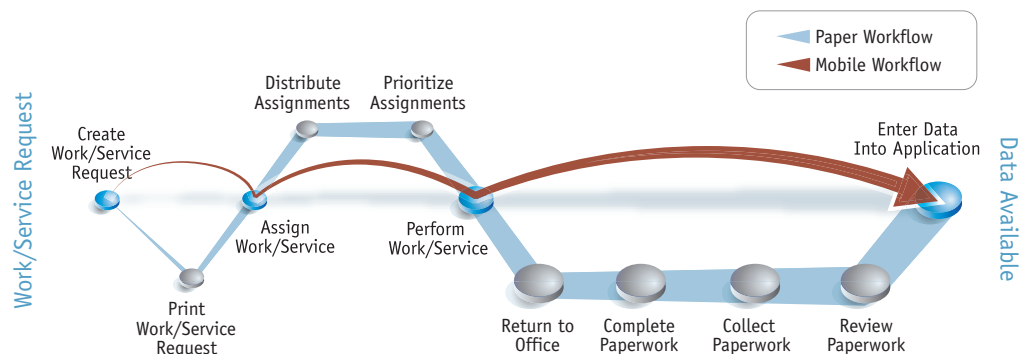

Improved First-Time Fix Rates — Access to job plans, safety information, customer / order information and asset history at the point of performance allows workers to work smarter.

Better Planning and Scheduling — Mobile technology delivers real-time data, allowing managers to optimize shift schedules, prioritize assigned work to prevent bottlenecks and increase customer satisfaction.

Greater Utilization of Applications — Capturing data for direct upload from the point of performance to back-office systems improves accuracy by 30 to 50 percent

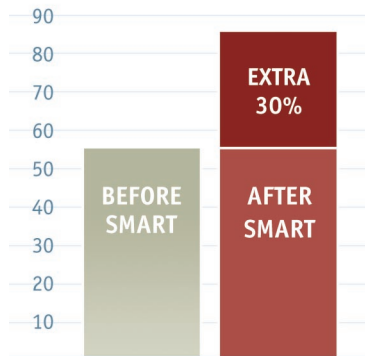

Extended Asset Life — Improved productivity and planning allow workers to perform more preventive maintenance, reducing unexpected outages and emergency fixes.

Exceeded Customer Expectations — Mobile technology provides the tools needed to get the job done effectively the first time, meeting customer expectations and minimizing the cost of service.

The SMART Mobile Suite of out-of-the-box products enables your organization to quickly reach a new level of efficiency — significantly affecting the bottom line, improving data accuracy and allowing you to realize sustained productivity gains and control operating costs.

THE 100% CONFIGURABLE,
PREINTEGRATED SMART PRODUCTS
ENABLE RAPID ROLLOUTS AND FAST
REALIZATION OF SIGNIFICANT
PRODUCTIVITY GAINS.

SMART PERFORMANCE FOR OPERATIONS BEST PRACTICES

A suite of related products delivers exponentially more value with each additional deployment. Subsequent rollouts are easier to install, learn and use. SMART Suite offers the most effective tools to extend the data of powerful applications to key personnel, including technicians, storeroom staff, inspectors, supervisors and managers.

SMART Work Manager

Boost productivity and improve on-the-job performance by connecting mobile employees with the critical data they need to better manage work and service requests. Once workers log on, they can easily download work orders, view job histories, record job status, capture data, revise accounts, place orders and update back-end systems for a completely paperless and accurate workflow. The easy-to-use SMART Work Manager allows for uninterrupted work regardless of wireless connectivity

SMART Auditor

Conduct easy audits by utilizing detailed data collected at the point of performance. With SMART Auditor, asset location and condition data populate formerly unknown fields in your systems for ensured compliance with government regulations. With the increased quality, quantity and availability of data, you will improve your service capabilities and eliminate the guesswork regarding equipment utilization.

SMART Inventory Manager

Manage inventory levels, avoid costly stockouts and enable storeroom, warehouse and field sales employees to quickly and efficiently track material movements using mobile devices. SMART Inventory Manager improves cycle counts, accuracy and speed.

SMART Schedule

Create schedules and identify priorities with ease for better service and optimal workflow. With SMART Schedule, you will complete service orders on time and improve customer satisfaction while eliminating workload bottlenecks and downtime, reducing costs and needless work time. You'll balance workloads quickly and easily for a more efficient and productive workplace.

ADDITIONAL SMART MOBILE SUITE PRODUCTS

Other preintegrated, out-of-the-box SMART products include:

Calibrations Module

Enter and access measurement data to evaluate asset accuracy, deviation and repeatability during calibrations rounds.

SMART Inspections

Enable fast, accurate room condition assessment and asset monitoring.

SMART Rounds

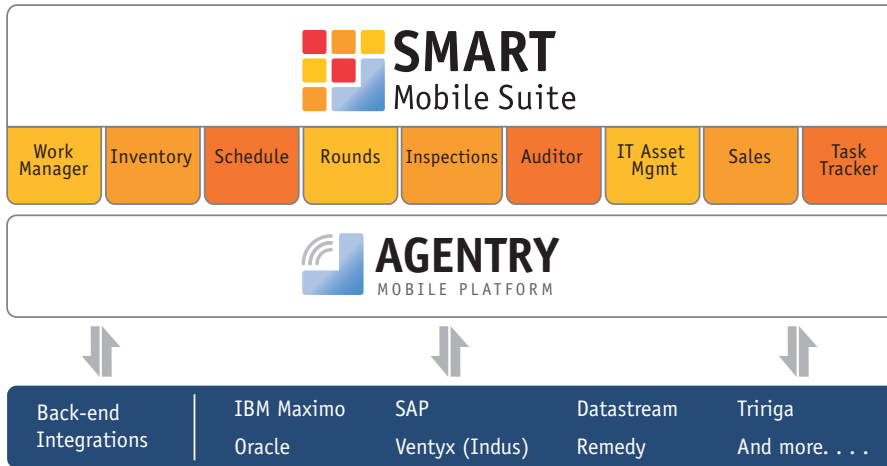

Quickly conduct operator rounds to improve quality and quantity of collected data and isolate problems on the spot.

SMART Task Tracker

Mobilize data capture and task sign-offs to speed shutdowns, turnarounds and outages while maintaining a clear view of your critical path.

BUILT ON AGENTRY

All SMART products are built on Syclo’s flexible Agentry™ platform. Refined through more than a decade of development, Agentry enables easy configuration and expands as your needs evolve — lowering your total cost of ownership.

In a survey of mobile software users, the top two benefits realized were "Better Reporting Capabilities" and "More Completed Work."

PROVIDING FAST, SUSTAINED VALUE

When choosing a mobile technology partner, consider your organization’s needs and objectives. Syclo’s solutions deliver a quick return on your investment while continuing to focus on long-term business value.

Considerations	The Syclo Difference
Readiness for Use	Preintegrated with industry-leading back-end systems; includes a library of proven process automation solutions
Mobile Platform	Syclo’s Agentry platform is designed to manage complexity of mobile technology; delivers 30-50% lower TCO; allows for seamless upgrades
Deployment Speed	Professional services team deploys solutions in weeks
Internet Connectivity	Allows for switching between online and offline mode, WWAN and WLAN, without affecting productivity
Internet Connectivity Peripheral / Device Support	Supports more than 25 peripherals, including GPS, GIS and RFID
Mobile Workflow	Intuitive, best-in-class mobile workflow and user-friendly interfaces advance productivity

DEPENDABLE, FLEXIBLE COMMUNICATION

Syclo's mobile solutions can be used with a range of devices, communication methods and peripherals, allowing your team to stay productive in and out of wireless coverage. Mix and match to meet your organization's needs — and support them all with one set of business logic without having to write code.

ABOUT SYCLO

Since 1995, Syclo has helped more than 800 organizations across industries leverage mobile technology to streamline workflow and improve productivity. Syclo's solutions make data collection and decision making faster, easier and more reliable — reducing costs and driving more value from enterprise systems. Together, Syclo's Agentry™ platform and SMART Mobile Suite products help companies gain a real-time, 360-degree view of operations to support ongoing growth and profitability.

INDUSTRY APPLICATIONS

Syclo delivers solutions for all major industries, including:

- Facilities Management
- Government
- Life Sciences
- Manufacturing
- Oil & Gas
- Utilities
- Water / Wastewater

AUTOMATED FUNCTIONALITY

Syclo provides a library of process automation solutions for common tasks, including:

- Preventive / Corrective Maintenance
- Crew Reporting
- Issues and Transfers
- Inventory Cycle Counts
- Inspection Forms
- Lockout / Tagout
- E-signature Capture
